DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

Claims 1 and 5 have been allowed over the prior art of Ouchi, Takahashi, and Barron references because they fail to teach the GaAsN confinement layers sandwiching the active region and the GaAsN barrier layers sandwiching said at least one quantum well.

Claims 2 and 6 have been found allowable due to their dependency on claims 1 and 15.

Regarding claim 3, Applicant argues that the Takahashi prior art only teaches the lower barrier layer of GaAsN and the upper barrier layer of GaAsNO sandwiching the quantum well. The Takahashi prior art does not teach the **GaAsN barrier layers sandwiching the at least one quantum well** as recited in the claim. The argument is persuasive and therefore claim 3 is allowed over the prior art.

Claim 4 has been found allowable due to their dependency on claim 3.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
